## About Us

Boxtrone Electronics is a venture started by Team Boxtrone. We provide highest quality electronics design & development services in the areas of Network solution and consultancy, Hardware and Software Integration, Server Maintenance, GPS & Automation, Knowledge services and apart from all these we mainly focus on the development and manufacture of creative products. For that we have a team of dedicated innovators here.

## What In Future?

We will go for Human Machine Interface. No more buttons, switches or touch enabled controls. We foresee a future where humans can control the devices using their thinking capacity. We foresee a technology which can sense and prevent the damages or faults.

## GPS & Automation

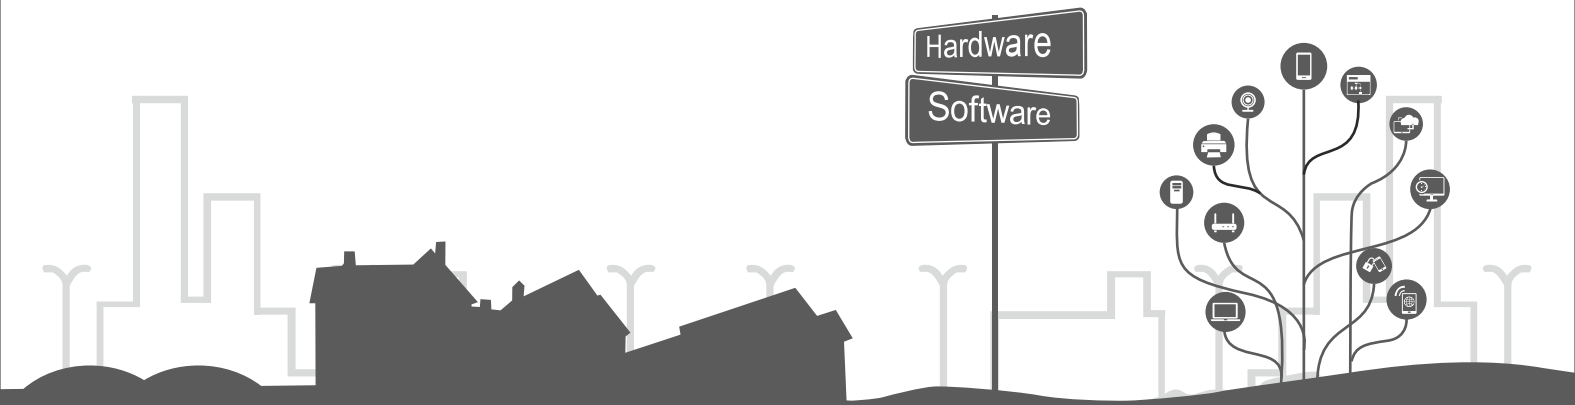

We have every GPS Tracking Solutions. Devices which are perfect for tracking vehicles or any other assets. We are also experts at automation. We can Implement automation at factories and houses. Home automation leads to efficient utilization of Lighting, Heating, Ventilation and Security.

- » Heavy Equipment GPS tracking Solution.
- » Personal Car Tracking
- » Fleet Management Solution

## Hardware & Software Integration

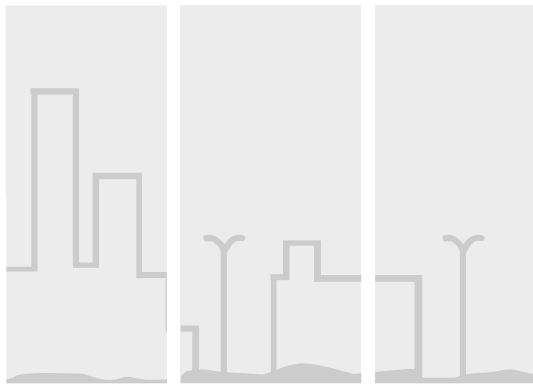

We are experts in machine programming. We find pleasure in developing new hardware devices. We believe that any ideas which reduce the human effort can be developed. From surveillance systems, to Ware House Management, to Medical Equipment and Home Appliances, Hardware Integration Makes Life easier for Consumers and Employees as well as Lowers Overall Costs. So, never think twice if you are in need of customized hardware devices for your business.

## Server Maintenance

We Provide Reliable and Prompt Server Support and Maintenance Services. Our Services are cost Effective, Rock-Solid Network Design That is Scalable for Future Growth. Allow us to Manage your Technology, So you can Manage your Business.

- » Cloud Space
- » Hosting Space
- » Data Security

## Network Solution & Consultancy

According to your demands, our network design team can develop and formulate the architecture. With the help of enormous experience and knowledge in this field, we are completely dependable in the cases of timely completion and up-to-date services.

- » Switching
- » Server & System Configuration
- » Security System
- » Routing

## Knowledge services

We are always happy to share every single new piece of information. We believe that knowledge has no value unless it is used and shared. We could provide training on your subjects and help you throughout your academic projects. Areas we Concentrate are Arduino projects, Robotics, Mechatronics and Bio - Medical

- » Training for Fresher's
- » Project Consultancy & Solutions
